## **Ski**lls

### Technologies
NODEJS/NESTJS, TYPESCRIPT, REACTJS, MYSQL/MSSQL

### Infrastructures
DOCKER, AWS (EC2, ECR, ECS, RDS, ELB, S3, CLOUDFRONT)

## **Wor**k Experience

### Cambium Applicable Innovation
Cambium is a software company that provides software development services for large-scale customers.

**FULL STACK DEVELOPER**                                                              *March 2021 - Present*

Recent Projects I have developed:

**Maccabi Healthcare Services - Current**
- Developed the backend from the ground up, using NestJS & TypeORM, and MySQL.
- Built cloud-based production and QA environments using Docker and AWS with services such as RDS, ECR, ECS and ELB.
- Developed a dedicated CMS for clients' data management using ReactJS.

**RGE (Sport5, KidsTV, Knesset) - Current**
- Maintaining multiple projects used by thousands of users, including app servers, websites, and DB's.
- Utilizing a wide range of technologies and frameworks, such as PHP, NodeJS, Angular, MongoDB, and AWS & GCP tools.
- Currently developing a new multipurpose media player to replace the existing one, meant to be used throughout all of RGE's platforms.

**ICL Group**
- Took part in developing both the backend and frontend of their inhouse social network, using NestJS, TypeORM, MySQL and ReactJS.
- Designed and developed a server-side PDF generation tool integrated with several companies' services.

- Developed Automated Continuous Data Replication solutions for Holland-Moran and Gestetnertec, handling MySQL, MSSQL, PostgreSQL, and IBM DB2.

## **Edu**cation

### The Open University
B.Sc. IN COMPUTER SCIENCE                                                              *2016 - 2020*

## **Ext**racurricular Activity

### JDC Israel, Ashalim, Mifalot Education and Society, Tsafona-Daroma
VOLUNTEER WORK                                                                         *2014 - Present*

Various projects with at-risk youth mainly revolve around music or computers.
